

- JOB WIZARD & LOAD'N GO – EASY TO USE
- MAXIMUM VERSATILITY WITH FLEXFEED & VERSAFEEDER
- MODULARITY FOR BUDGET OPTIMISATION
- HIGH PRODUCTIVITY WITH HIGH CAPACITY HOPPER & STACKER
- OPTIMISED FRANKING WITH SORTING OPTIONS

ADAPT YOUR SYSTEM TO YOUR NEEDS

The DS-90 can be expanded from 2 up to 7 stations at any time, providing additional capacity and protecting your investment. Simply add the right module at the right time – as your company grows. The multiple function options allow you to take on more job orders, further optimizing your productivity.

The modular design of the DS-90 gives you peace of mind and ensures that your equipment investment is cost-effective today and into the future.

SPECIAL FEEDERS FOR EXPANDING NEEDS

These optional feeders have been specially designed to handle a wide variety of paper types, including coated material and even small booklets.

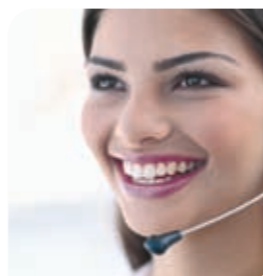

MAXIFEEDER FOR SUBSTANTIAL NEEDS

Load up to 1,200 sheets or 325 BRE's in the optional maxiFeeder.

INSERT'N FRANK

Automate your total mail flow by connecting the DS-90 to a Neopost franking system.

ON LINE SERVICES

Experience optimised DS-90 uptime through enhanced remote assistance.

DS-90

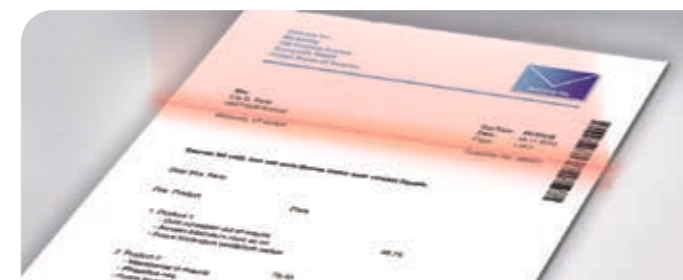

YOUR MAILROOM SPECIALIST

PRODUCTIVITY, VERSATILITY AND EASY-TO-USE

Don't miss business opportunities on account of your Folder Inserter. With DS-90, Neopost facilitates productivity, flexibility and ease of use at the highest level. Opportunities are unlimited, as it performs your daily administrative jobs and excels in direct marketing applications. Moreover, with many upgrade options, your future needs are also secured.

- JOB WIZARD & LOAD'N GO – EASY TO USE
- MAXIMUM VERSATILITY WITH FLEXFEED & VERSAFEEDER
- MODULARITY FOR BUDGET OPTIMISATION
- HIGH PRODUCTIVITY WITH HIGH CAPACITY HOPPER & STACKER
- OPTIMISED FRANKING WITH SORTING OPTIONS

FULL CONTENT CONTROL AND SECURITY YOU CAN RELY ON

Thanks to its exclusive scanning device, the DS-90 can read any type of coding such as OMR 1 and 2 tracks, 1D barcodes and 2D Datamatrix. Furthermore, the code can be printed anywhere on the document. This unique feature provides full flexibility to fulfill any layout requirement.

To securely process personalised mail runs and those with a varying volume of documents per set, the DS-90 includes several automatic

features to ensure that every recipient receives precisely the right mail piece.

- Reading of sequencing marks allows you to control printing accuracy and inserts can be selected based on customer profile.
- Optional Integrity Checking Software ensures 100% accurate mail processing.

FULL COLOUR TOUCH SCREEN WITH LOAD'N GO AND JOB WIZARD

The DS-90 interface has a full colour touch screen and a job wizard, therefore using the entire system could not be made easier. Skilled operators are no longer required. With the exclusive **load'n Go** technology, you simply load documents and envelopes, and then press start. Furthermore you can adjust the position of the screen so that the user can view it more comfortably.

HIGH UPLOADING & DOWNLOADING CAPACITY

The Optional High Capacity Envelopes Hopper and Conveyor (each with a capacity of 1,000 envelopes) enable you to remain one step ahead. DS-90 has many optional devices allowing you to design your own custom system to meet your current and future needs.

AUTOMATE YOUR DOCUMENT PROCESSING

Neopost's Output Management Software (OMS-100) will get the best out of each and every of your documents.

- Automatically add Barcode at the right place to drive your folder inserter.
- Remove your old OMR marks, giving more value to your document.

- Select inserts from multiple trays.
- Guarantee your mail integrity with secure control marks.
- Split your print file based on number of pages.

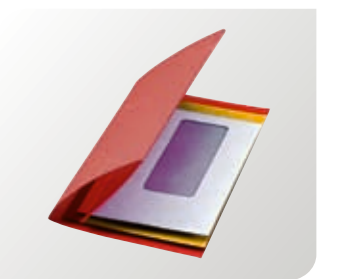

EFFICIENT MAIL SORTING

DS-90 automatically sorts mail into two exits, based on postal zip code, set thickness, OMR mark, franking rates, or any combination of the above. The unique High Capacity **powerStacker** allows the system to be unloaded in an easy, convenient manner.

VERSAFEEDER

In order to provide increased flexibility, Neopost has developed a unique and specialised feeder to process thicker stiffer material, such as booklets and brochures. Moreover, the **versaFeeder** can be loaded from the top to ensure that running is uninterrupted.

CREATE YOUR OWN PROFESSIONAL LOOKING MAIL PIECE

Collating documents before folding them is not only faster than collating them in the envelope, it also ensures a perfect presentation and reduces the risk of jamming.

With **powerFold** you can crisply and quietly fold up to 10 pages in single fold and 8 pages in tri-fold. The clam shell design of the DS-90 allows easy access to the folder.

MONITOR, SECURE AND TRACK YOUR PRODUCTION OUTPUT

Neopost offers you the security that your printed jobs are actually being mailed. **Mail Piece Production Control** adds a unique ID to each letter within the address block and builds up an audit trail for each production job.

Equipped with MPPC your DS-90 can scan a barcode on every mail piece. This ensures total quality control of your mail batch and identifies missing or out-of-sequence letters.

All in all this provides you with real-time quality control and detailed line-item reports:

- Assurance that jobs are accurate and complete
- Real-time failure detection of missing or 'out-of-order' mail pieces
- A hard-copy 'Proof of Mailing' report for each mail production job
